Work experience

● We Talk AI

May 2025 - Feb 2026

- Development and maintenance of frontend and backend applications, applying software development best practices.
- Implementation of AWS services such as Lambda, Cognito, EC2, S3, and DynamoDB
- Architecture improvements and system migrations to enhance scalability, performance, and maintainability.

● Nebulae

Feb 2024 - Feb 2025

- Requirements analysis: identification and documentation of functional and technical needs.
- System improvements: feature development, code optimization, and bug fixing.
- Database scripting: creation and modification of scripts to efficiently manage data.
- Microservices operations: maintenance and support of microservices-based architectures.

● GBI-Mark

Dec 2022 - Sep 2023

- CRM development: design and implementation of CRM systems tailored to client requirements.
- Web portal development: implementation of web portals based on client needs.
- Feature enhancements: addition of new functionalities to CRMs and web portals.
- Code refactoring: optimization of code to ensure efficiency and long-term maintainability.
- Requirements analysis: assessment of needs and translation into technical solutions

● Wolkvox

Jan 2022 - Oct 2022

- Application enhancements: updating and optimizing systems based on client requirements.
- Incident resolution: troubleshooting and resolving application issues to ensure reliable operation.
- Chatbot and IVR development: design and implementation of automated solutions for clients.
